Good Homes Repairs and Maintenance Summit presenters:

Kay Saville-Smith is programme leader for the Good Homes project. She is a sociologist and director of CRESA and specialises in applied social research in housing, public policy and community development.

Bev James is Director of Public Policy & Research. Her research and policy interests focus on housing, education, community development and resource management.

Robin Kearns is Professor of Geography at the University of Auckland and based in the School of Environment.

Denise Bijoux is an independent social researcher and social policy advisor. She works in the areas of health, social justice, community-led development and sustainability planning.

Elsie Ho is an Associate Professor and Director of Population Mental Health in the School of Population Health of The University of Auckland. Her major research interests are migration, diversity and Asian health and wellbeing.

Roman Jaques is a senior environmental building scientist with BRANZ, New Zealand's only independent research, testing, consulting and educational company providing resources for the building industry.
